

Sexual and Reproductive Health and Rights

Organisation Ministry of Foreign Affairs, The Hague Budget Holder: BUJ	Publication Date May 2020	Reporting Period reports received between 1 October 2018 - 1 September 2019
---	-------------------------------------	---

Result area 1 - To protect, promote and fulfil universal access to sexual and Sexual and Reproductive Health and Rights

RESULTS
The sexual and reproductive health programmes continued to work on protecting, promoting and fulfilling universal access to reproductive health information, products and services. Public health facilities continued to offer contraceptives using the available stocks that were built up by earlier support: 98% of public health facilities have now at least 7 types of contraceptives at their disposal and a minimum of 2 staff trained in supply chain management. Private distribution channels continued to be supported, selling 3,800,000 subsidized condoms through kiosks and reaching 12,000 new users of contraceptives through private clinics.

INDICATORS	Baseline	Target	Result	Source
------------	----------	--------	--------	--------

General and nationwide access to SRHR (qualitative)
Assessment of the results achieved across the entire result area 1
Assess achieved results compared to planning: C. Results achieved as planned
Reasons for result achieved: # 26887 administratively ended but left SRHR/ contraceptives supply that continue serving the government. Health Districts (nationwide) benefited from coaching and are using acquired competences. Increasing number of NL supported private facilities are complementing GoB effort to provide info and SRHR service. Availability and access to appropriate reproductive health information, products and services (through health and non-health providers, schools and youth initiatives) have improved. This has resulted in a higher number of contraceptives users, reduced teenage pregnancies and, over time, a reduced fertility rate.
Implications for planning: Direct funding to IPPF affiliate (Abubef) local partner was identified to sustain promotion of access and free choice for family planning including Voluntary Contraceptive Surgery. *This projet started with delay (Feb 2020).*

Result area 2 - Better information and greater freedom of choice for young people Sexual and Reproductive Health and Rights

RESULTS
Increasing number of young people(male and female) are better informed and have greater freedom of choice about their sexuality. Teenage pregnancies rate is decreasing in school, particularly within public schools that are already partnering with NL supported partners with a coverage of 1/4 of the total number of schools in the country.

INDICATORS	Baseline	Target	Result	Source
SP_Number of health facilities with youth-friendly SRHR services, youth centres and schools with	0	317	5	29273; 27903; 4000002431
SP_Number of youth (15-24 yrs) receiving contraceptive at PSI (Tunza) Clinic	0	10000	10109	29273

Assessment of the results achieved across the entire result area 2
Assess achieved results compared to planning: C. Results achieved as planned
Reasons for result achieved: Partners are being pushed and encouraged to build more and more synergy. Creativity and strategic scale up approach is being strongly supported by the Embassy
Implications for planning: Covering more primary and secondary schools including private schools. Focus on *Initial training* of paramedic and education professional will be reinforced to complement the "current on job training" mode. OKP initiatives and support will help to cover some of the needs here.

Result area 3 - Better public and private health care for family planning, Sexual and Reproductive Health and Rights

RESULTS
Increasing number of public and private health care offert quality info and care for family planning and pregnancies. Supported private facilities address "post abortion care". FP users are increasing, impacting the(slow but continue)

INDICATORS	Baseline	Target	Result	Source
SP_Number of new FP users	0	8000	11820	29273
SP_Number of Women of Reproductive Age (WRA) received at Tunza clinics for contraceptive	0	70000	30350	29273
SP_Total fertility rate	12	10	5	27903; 29273

Assessment of the results achieved across the entire result area 3
Assess achieved results compared to planning: C. Results achieved as planned
Reasons for result achieved: FP users are increasing. Development partners become more and more demographic sensitive. Professional training is being provided to health and non-
Implications for planning: More effort needed to boost the Government engagement to comply with the national target of 3 kids/ women. Creative "business case approach" will be needed for this.

Result area 4 - Improved access to contraceptives and medicines Sexual and Reproductive Health and Rights

RESULTS
Improved access to and use of contraceptives and SRHR intrants. We learned from a *market analyses* conducted in 2019 that the access as such is not a problem. Supply is good, access as well. Demand creation remains as a focus for the coming years.

INDICATORS	Baseline	Target	Result	Source
ST_# of couples protected by various contraceptives over a 1-year period (couple-years)	167347	98020	58462	29273
SP_Number of young people that received family planning consultation	42127	31831	10109	29273

Assessment of the results achieved across the entire result area 4
Assess achieved results compared to planning: C. Results achieved as planned
Reasons for result achieved: SRHR products, info and service being offered along with increased promotion of freedom of choices and (contraceptives) options for all
Implications for planning: Demand creation remains a focus for the coming years. Communication gaps are being identified. Tailor-made messaging is being worked out to target different categories of actors and clients. No all size fits all work for sensitive topic like SRHR/Gender and Youth sexuality. We remain hopeful because of the country's small size despite of the time needed to enhance behavioural and mindset positive change. New communication and technology partners (Bibliothèques sans Frontières, AUXFIN platform, Jimbere magazine, Yaga bloggers) have been brought on board to strengthen reach and effectiveness of reproductive health and gender communication. Tailor-made messages are being developed for a receptive environment for reproductive health demand, lobby and advocacy and public diplomacy.

Result area 5 - More respect for the sexual and reproductive rights of groups who Sexual and Reproductive Health and Rights

RESULTS
Qualitative and continuous support to respect for SRHR of groups who are currently denied these rights

INDICATORS	Baseline	Target	Result	Source
------------	----------	--------	--------	--------

Enabling environment promoting universal and responsible, equitable, inclusive and fair access to SRHR
Assessment of the results achieved across the entire result area 5
Assess achieved results compared to planning: C. Results achieved as planned
Reasons for result achieved: Close contact and more holistic support to youth (whose freedom of choice are often in conflict either with the school regulation or adults/ parents views...) and educators (incl.parents). The embassy invests on Public diplomacy, lobby and plaidoyer to adress contextual challenges. Key population and social justice activists are listened and qualitatively accompanied. Community prevention activities targeting specific key populations continue to be carried out by the Global Fund and HIV Alliance partners to further reduce the HIV rate, currently at 0.9% (2017).
Implications for planning: More "Mind the mind", " mind the words" approach and consideration. Going more with business approach promoting " life planning, risk management, youth life skills, employability and employment " instead of going with unpacked and isolated sensitive wording such as " youth sexual right, abortion ...".
