

Sexual and Reproductive Health and Rights

Organisation Ministry of Foreign Affairs, The Hague Budget Holder: ADD	Publication Date May 2020	Reporting Period reports received between 1 October 2018 - 30 September 2019
---	-------------------------------------	--

Result area 1 - Better information and greater freedom of choice for young Sexual and Reproductive Health and Rights

RESULTS
Political unrest has contributed to programmes being less effective (less time operational in the field) than anticipated. The baseline data for people reached with Comprehensive Sexuality Education was based on a different less intensive definition of CSE.

INDICATORS	Baseline	Target	Result	Source
SP_# mechanisms in place to ensure meaningful youth participation in implementing	2	39	7	27632; 4000000122; 27560
ST_# of health facilities that adopt and implement youth-friendly SRHR and HIV/AIDS services	25	417	77	27632; 29485; 4000000122
ST_# of young people reached with comprehensive, correct information on sexuality, HIV/AIDS,	2955407		1017217	846,519 27632; 4000000122
ST_# of youth who participate in policy and decision-making bodies and perceive their	100	1540	1083	27632; 27560; 4000002878
SP_RF_2019 # of girls aged 15-24yr who ever received education about sexuality	0	1016	648	4000000122

Assessment of the results achieved across the entire result area 1	
Assess achieved results compared to planning:	C. Results achieved as planned
Reasons for result achieved.	Meaningful youth participation has initially been less than anticipated, but is expected to pick up. Youth friendly services are no priority anymore, more emphasis is given to reaching out to the youth in the community. Youth participation in decision making is effective, but not in the same numbers as expected. The programme in Afar is reaching girls/young women with sex education, but the initial target was a bit too ambitious.
Implications for planning.	Consider continued support to Family Guidance Association Ethiopia (FGAE - 27632)

Result area 2 - Better public and private health care for family planning, Sexual and Reproductive Health and Rights

RESULTS
The programmes are only slightly below their targets. The data used for birth attended are from a demographic health survey, which is more reliable, but significantly lower than the routine information system that generates the target

INDICATORS	Baseline	Target	Result	Source
ST_# of births attended by skilled health personnel			4570894	3686205 27560; 29485; 4000000122; 27632; 28540
ST_# of comprehensive safe (post)-abortion care services provided	174913	561567	503441	27632; 29485; 4000000122
ST_# of health workers trained in ANC and PNC, safe delivery and abortion care	188	6032	4171	4000000122; 29485; 27560; 27632; 4000002878
ST_Type and number of initiatives to promote private sector involvement in SRH and HIV/AIDS services	0	2	1	4000000122

Assessment of the results achieved across the entire result area 2	
Assess achieved results compared to planning:	C. Results achieved as planned
Reasons for result achieved.	Targets have been too ambitious, yet results have been impressive.
Implications for planning.	Data quality needs to be improved (survey data > routine info data)

Result area 3 - Improved access to contraceptives and medicines Sexual and Reproductive Health and Rights

RESULTS
Political unrest has contributed to programmes being less effective (less time operational in the field) than anticipated, but also reduced funding from other donors affected the performance of DKT

INDICATORS	Baseline	Target	Result	Source
ST_# of couples protected by various contraceptives over a 1-year period (couple-years)	1420298	27377452	22132574	4000000122; 29485; 27560; 27632; 4000002878
ST_# of eligible PLHIV receiving ART_	455		467769	28540; 27632
SP_% currently married women of reproductive age (WRA) who use modern contraceptive	NA	NA	38	28540
SP_% of eligible PLHIV receiving ART_	NA	NA	72	28540

Assessment of the results achieved across the entire result area 3	
Assess achieved results compared to planning:	D. Results achieved poorer than planned
Reasons for result achieved.	Results still impressive. Funding to DKT by other donors was less than expected.
Implications for planning.	Continued core support to DKT, with exit strategy.

Result area 4 - More respect for the sexual and reproductive rights of groups Sexual and Reproductive Health and Rights

RESULTS
With the new government more women are involved in positions of (political) decision making. Also laws affecting civil society have been liberalised, providing more space for advocacy.

INDICATORS	Baseline	Target	Result	Source
ST_Changes in laws, guidelines, and (health)policies and practices leading to decrease of	-Nationwide promotion of	Endorsment of national	Development of national	27870
SP_Number of Human Rights violation cases responded to	0	30	85	29556

Assessment of the results achieved across the entire result area 4	
Assess achieved results compared to planning:	C. Results achieved as planned
Reasons for result achieved.	Although still very traditional, openings appear to discuss and address the plight of Commercial Sex Workers (CSWs) and sexual minorities
Implications for planning.	Intensify support for CSW
