**Result area 1**

**FNS Result area 1**

**ASSESSMENT OF RESULTS**

Progress towards outputs and outcomes is in line with the plans for this year. With support from the Netherlands in total 960 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income increased to about 10,000, while the number of jobs supported in agricultural chains/sectors increased to about 1200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.

**Results achieved as planned**

- Increase productivity and/or income
- Number of family farms with increased productivity and/or income
- Increased jobs supported in agricultural chains/sectors
- Number of people that enjoyed (more) secure tenure rights to land

**Implications for planning**

Planning stays on track. Good cooperation between the different implementing agencies. Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water. Some activities experienced delays, both because of political and technical challenges faced by the implementing agencies.

**Reasons for result achieved**

- With Dutch support our project partners work directly with farmers, but also with cooperatives, agri-businesses, research institutes and the government. The Netherlands helps Palestinian farmers put their land to sustainable and economically viable use, helps agri-businesses become more competitive and enter into support of controlling and preventing illegal deforestation.
- Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water. Some activities experienced delays, both because of political and technical challenges faced by the implementing agencies.

**Assessment of the results achieved across the entire result area 1**

- Results in line with plans, as explained above.
- Progress in achieving results is in line with plans and expectations.
- With support from the Netherlands in total 960 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income increased to about 10,000, while the number of jobs supported in agricultural chains/sectors increased to about 1200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.

**ASSESSMENT OF RESULTS**

Progress towards outputs and outcomes is in line with the plans for this year. With support from the Netherlands in total 960 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income increased to about 10,000, while the number of jobs supported in agricultural chains/sectors increased to about 1200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.

**Results achieved as planned**

- Improve secure tenure rights to land
- Number of families with improved access to input and/or output markets
- Number of families directly reached
- Number of families with increased productivity and/or income

**Implications for planning**

Planning stays on track. The delays incurred will be made up for in the next 12 months. A mid-term evaluation will be carried out in the next 6 months and will provide valuable lessons learned, both for the implementing agencies and for the donors.

**Reasons for result achieved**

- With Dutch support our project partners work directly with farmers, but also with cooperatives, agri-businesses, research institutes and the government. The Netherlands helps Palestinian farmers put their land to sustainable and economically viable use, helps agri-businesses become more competitive and enter into support of controlling and preventing illegal deforestation.
- Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water. Some activities experienced delays, both because of political and technical challenges faced by the implementing agencies.

**Assessment of the results achieved across the entire result area 2**

- Results in line with plans, as explained above.
- Progress in achieving results is largely according to plan. Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water.

**Result area 3**

**FNS Result area 3**

**ASSESSMENT OF RESULTS**

Progress towards outputs and outcomes is in line with the plans for this year. With support from the Netherlands in total 960 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income increased to about 10,000, while the number of jobs supported in agricultural chains/sectors increased to about 1200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.

**Results achieved as planned**

- Increase employment in agricultural chains/sectors
- Number of family farms with improved access to input and/or output markets
- Number of family farms with increased productivity and/or income
- Number of families with improved access to input and/or output markets

**Implications for planning**

Planning stays on track. The delays incurred will be made up for in the next 12 months. A mid-term evaluation will be carried out in the next 6 months and will provide valuable lessons learned, both for the implementing agencies and for the donors.

**Assessment of the results achieved across the entire result area 3**

- Results in line with plans, as explained above.
- Progress in achieving results is largely according to plan. Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water.

**Result area 4**

**FNS Result area 4**

**ASSESSMENT OF RESULTS**

Progress towards outputs and outcomes is in line with the plans for this year. With support from the Netherlands in total 960 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income increased to about 10,000, while the number of jobs supported in agricultural chains/sectors increased to about 1200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.

**Results achieved as planned**

- Ensure secure tenure rights to land
- Number of family farms with improved access to input and/or output markets
- Number of family farms with increased productivity and/or income
- Number of families with improved access to input and/or output markets

**Implications for planning**

Planning stays on track. The delays incurred will be made up for in the next 12 months. A mid-term evaluation will be carried out in the next 6 months and will provide valuable lessons learned, both for the implementing agencies and for the donors.

- Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water. Some activities experienced delays, both because of political and technical challenges faced by the implementing agencies.

**Assessment of the results achieved across the entire result area 4**

- Results in line with plans, as explained above.
- Progress in achieving results is largely according to plan. Valuable work has been carried out this past year in giving Palestinian farmers better access to land and water.
### To what extent have the outcomes for this result area been achieved?

**With Dutch support, project partners work directly with farmers, but also with cooperatives, agri-businesses, research institutes and the government. The Netherlands helps Palestinian farmers put their land to sustainable and economically viable use, help agri-businesses become more competitive and work in support of controlling and preventing plant diseases in the West Bank and in Gaza.**

With support from the Netherlands, 60,000 hectares of farmland were converted to sustainable use. The number of family farms that doubled their productivity and/or income reached about 10,000, while the number of jobs supported by agri-food and horticulture increased to about 1,200 and the number of people that enjoyed (more) secure tenure rights to land reached about 500.
